EKATERINA MIRLENKO
Frontend Developer

A dedicated Frontend Developer with 2+ years of hands-on experience and proficiency in JavaScript, TypeScript, HTML, CSS, React, Next.js and Vue.js, continuously expanding my knowledge. Driven to broaden my expertise, I aspire to obtain a Full-Stack Developer's qualifications by contributing to innovative impactful projects and growing within a team that values curiosity and has a supportive work environment.

WORK EXPERIENCE

Frontend Developer
Dachnik startup project | remote, volunteering

March 2023 – Present

- Developing the frontend for a website for a house construction company - Dachnik.
- Engage in the creation and enhancement of dynamic, user-friendly interfaces using Typescript, Next.js and Vanilla Extract CSS.
- Work closely with the Backend Developer to integrate frontend interfaces with server-side applications, ensuring seamless data flow and functionality.
- Collaborating with the design and product teams, doing the A/B tests and maintaining brand consistency throughout the website.

Junior Frontend Developer
RestMonster startup project | remote, volunteering

September 2023 – February 2024

RestMonster - is a modular platform for small businesses. It provides the management of clients, orders and delivery.

- Actively participated in the design, development, and implementation of user interfaces in collaboration with a Senior Frontend Developer. I contributed to end-to-end solutions using JavaScript, Vue.js and Bootstrap.
- Improved user experience by continuous manual testing and resolving possible errors.
- Applied knowledge pursued learning through Frontend Learning courses.

**Professional development –
Frontend Development Education**

September 2022 – August 2023

- Completed learning courses in JavaScript, TypeScript, React, Vue.js, Next.js, Node.js, HTML, and CSS.
- Actively engaged in practical learning through pet projects on GitHub to apply theoretical knowledge in real-world scenarios.

Maternity Leave
Full-time parenting and relocation to Oslo, Norway.

April 2021 – August 2022

IT Project Manager
Ubertas Group – Twigtech | Melbourne, Australia, remote, full-time

May 2020 – March 2021

Twigtech – is a property management software. Multitool app for management, maintenance and accounting for real estate in Australia.

- Led the team of 8 developers responsible for build implementation, support and associated infrastructure, delivering the Twigtech project to the deadline.
- Coordinated debugging process and tracked task fixes with manual QA that accelerated the speed of development.
- Accomplished Junior Frontend tasks(React.js) helping the team with minor tasks.
- Created internal technical documentation and educational content as the User Guide and Product How-to-Use videos.
- Organized team meetings and improved communication among the team according to the Agile methodology.

Digital Marketing Specialist
Semrush Inc. | St.Petersburg, Russia, on-site, full-time

July 2018 – April 2019

Semrush – is an online visibility management SaaS platform that has been used by over 10,000,000 marketers worldwide.

- Made HTML&CSS layouts of e-mails and increased the engagement of new users to 10%.
- Collaborated with marketing teams to help develop new growth ideas, marketing strategies and updated teams on trends.
- Continuous A/B testing led to the increase of CTR of weekly digest campaigns by 15%.
